

Welcome to Gorongosa National Park!

Whether it is your first time to Gorongosa National Park (GNP) or you are returning, please make yourself familiar with the information below about living and working at Chitengo Camp and the E.O. Wilson Science Center.

RESEARCH PERMITS

If you haven't already applied for a Research Permit to conduct your studies in GNP, the first step is to submit a short proposal that contains the *Title of the Project, Name(s) of the Researcher(s), Institutional Affiliation, Objectives, Methodology, Time Frame, Expected Outcomes, and Statement of Financial Responsibility for costs incurred*. This proposal should be submitted to the Director of Scientific Services, Dr. Marc Stalmans: stalmans@gorongosa.net

VISAS & CUSTOMS

Researchers should apply for a **single-entry business visa for the amount of time you will need to be in country** to conduct your studies. Such a visa requires a copy of your research permit from GNP and a letter of support from the Gorongosa Project which you need to **request from us one month prior to the time you will apply for your visa**. The following information for the letter can also be sent to Dr. Marc: *full name, title and affiliation, nationality, passport number, date of issue, validity date, which Embassy/consulate will be used for the application, and proposed travel plans (approximate dates of entry and exit)*.

Recently, long-term visas in Mozambique have been a challenge for researchers to obtain, but we are trying to work with Mozambican Immigration officials in order to improve the situation. If your visa requires you to leave the country every 30 days, most researchers do this by making a trip to the Zimbabwe border. If we coordinate such a round-trip "visa run" the cost is 160 USD per vehicle and it is important to let us know well in advance of your visa's expiration. It is important that you look closely at what type of visa and length of stay you are granted and plan your trip accordingly.

In order to facilitate clearing any research equipment you wish to clear through customs, we also advise that you send a list of items **at least 2 weeks prior to traveling** to Vitor dos Santos: vitors@gorongosa.net

CONSERVATION FEES

The Conservation Fees which were initiated in 2019 will continue with all visitors, whether tourists or researchers, being required to pay the daily conservation fee of 20 USD for international visitors. However this fee is capped to a maximum of 15 days for a calendar year like a season pass. Therefore the maximum would be for any calendar year:

- Mozambique National MZN 1,500 meticaís
- SADC 150 USD
- International 300 USD

GETTING TO AND FROM CHITENGO CAMP

We can arrange transportation for you from the airport in Beira to Gorongosa. Please communicate your travel itinerary upon making your reservation, and should your flight be delayed, please make an effort to email Anne Marchington as soon as possible: annem@gorongosa.net. The cost of a one-way transfer between Beira and Chitengo is between \$80 and \$120, depending on either availability of vehicles or aircraft on the day of your transfer. **As many of our transfers are done by small planes, for the sake of yours and your fellow passengers' safety, the allowable luggage weight is strictly limited to 20 kg in soft bag or luggage.** Please let us know in advance if you will need special assistance with extra luggage as this can be transferred by road. Coordination on your way out is very important as well if you have brought large amounts of luggage since there is not time to make alternate arrangements.

TRAVELING AROUND GORONGOSA NATIONAL PARK

Most researchers find it necessary to rent a vehicle in order to conduct their fieldwork in Gorongosa. - Sixt Rental, at the Beira airport, works with us to offer a discount to our researchers. To obtain a discount on a rental vehicle, contact Sixt directly at: beira@sixt.co.mz and let them know you'll be conducting research at Gorongosa National Park. You will need to make a deposit and sign for the vehicle. The cost for a 4x4 vehicle from Sixt is approximately 150 USD/day this year. Some researchers have recently found similar rates with AVIS rental car even without a special discount when booking directly with them as well. Fuel can be purchased in Chitengo by providing your vehicle registration and signing the appropriate forms each time you fill up.

Millenium Bank in Vila Gorongosa has ATMs where international debit cards work, and US Dollars, Rand, and Euros can be exchanged in Beira and Chimoio. ATM Machines in the airport are the easiest way to draw Mozambican currency (meticaais).

E.O. WILSON LAB ACCOMMODATION PRICING

Science Cabins	< Week Stay	>Week; < Month	>Month
A - Cabin Single room & bathroom/ outside kitchenette	\$55/ night	\$45/ night	\$35/night
B - Cabin 2 separate rooms/ shared bathrooms	\$50/ night	\$40/ night	\$30/ night
Furnished Tent	\$20/ night		

BILLING, ACCOMMODATION, AND CHECKING IN/OUT

Please see Feli Msaya in the accounting office 2 days prior to departure so you can confirm the charges for which you'll be invoiced from the Gorongosa Project. The bill should be paid via electronic transfer according to instructions on the invoice. Accommodation and restaurant costs from Montebelo need to be paid at their reception, using credit card or cash, before you depart. **If camping or staying in a science cabin, please sign in and out with Anne or Feli upon leaving or returning to Chitengo. If staying with Montebelo, please inform reception.** ALL room keys should be left with Montebelo. A 50 USD replacement fee will be charged for lost keys.

LIVING IN CHITENGO

You can purchase meals at the Chikalango Restaurant operated by Montebelo Tourism where meals can range between 5 to 20 USD depending on what you order. In the event that accommodation is full at the E.O. Wilson Lab, you might also request a booking for lodging with Montebelo.

There is a basic common kitchen at the science center where you may cook. Please remember, the kitchen is shared by many and should be maintained and cleaned by everyone using the facility. Please also take note that baboons frequent the area so it is important to lock food in the kitchen and maintain cleanliness in all areas including your living space. **It is very important that everyone please wash their dishes directly after use as many people are sharing common spaces. Please also label and date your food and throw food away that has gone bad.** The nearest place to buy groceries is in Vila Gorongosa, which is 60 kilometers from Chitengo. If you need a shopping trip, please ask around to organize an outing with the next vehicle leaving the station. Beira (4 h away) and Chimoio (3 h away) are the nearest cities where one can purchase more specialized groceries.

If staying in a science cabin, it will be cleaned once a day during the workweek. Laundry should be left in the laundry bag or basket provided for washing.

There is unsecured wireless networks available at the camp. Movitel is usually the most reliable cell phone operator in the Gorongosa region and works best in the field. At least one person in your group should obtain a SIM card in case of emergency. SIM cards are 20 MTZ in Beira or Vila Gorongosa, but do not come with credit so be sure to purchase 200-300 meticaais worth of credit to start with.

The free Wi-fi in Chitengo is used by many people so many visitors and staff choose to obtain their own internet access by creating a hotspot on their cell phone with a SIM card or modem from Vodacom.

It is easy to hear people between offices, so please be respectful in your conversations; particularly if you are talking on Skype or the phone, it may be best to find a place away from the offices so as to not disturb your neighbors.

RESEARCH AT GNP AND THE E.O. WILSON LAB

We want to facilitate your research to the greatest extent possible, so please communicate your needs to us well in advance. All researchers are required to go into the field accompanied by a ranger, if they will be exiting their vehicles. **Rangers should be reserved at least one day ahead of time, but it is better to send a schedule ahead of time if you know your needs prior to arrival;** coordinate with Jason Denlinger: jason.denlinger@gorongosa.net
Ranger fees are now 5 USD whether half-day, full-day or a few hours and will be assessed for last minute cancellations as well.

Workspace is at a premium and should also be reserved through Jason before your arrival at Gorongosa. Each cabin also comes with a desk and internet access reaches the cabins. A -40 °C degree freezer and a lab grade refrigerator are available. Please let Jason know what you need to store in the fridge or freezer, so space can be optimized. We also have a herbarium and entomological collection for consultation, and some field guides and local reports are available for on-sight use. Please consult the gorongosa.net website for background information about the park.

If you need to store supplies at the lab, please pack things in a labeled box and leave a detailed list of the contents with Jason. If your supplies are left for over a year without an update from you, they will be discarded in the interest of space. Please do your best to return home with as many batteries as you can that you may have brought with you in order to be environmentally responsible. It is basically impossible to dispose of them properly here.

HEALTH AND SAFETY

You are required to purchase international medical/evacuation insurance for the duration of your stay in Gorongosa. In the event of minor illness or injury, Gorongosa has an onsite health clinic staffed by two nurses. There is also an ambulance on site for transport to Beira or Chimoio in the case of an emergency. For very serious situations, you will likely have to travel to Pretoria (South Africa) for care. Please call Jason Denlinger if medical assistance is required (826598421). If he cannot be reached, please call Mike Marchington (823343084). When in the field, you should have a Movitel cell phone or be accompanied by a ranger with a radio at all times. A limited number of radios can be checked out with Jason.

Please read through and complete pages 6-13 of this packet and send back to Jason electronically prior to your arrival in Gorongosa. Be sure to read through and understand the Guidelines for Researchers carefully as you are expected to abide by these guidelines while conducting your research.

OUR BIODIVERSITY DATABASE

One of the goals of research at Gorongosa is to exhaustively catalogue all species present. We have an interactive database that is constantly being updated. You can access it at the lab to learn about species occurrences. If you are willing to share data on your focal taxa or any interesting observations you make while at Gorongosa, your contributions would be greatly appreciated. Please contact Piotr Naskrecki for further information and to contribute data: pnaskrec@oeb.harvard.edu

Transport and Hotel Contacts in Beira, Mozambique

Country Code: +258

What to Pack?

Clothing :

Sun hat/bush hat
Headscarf/bandana – particularly before the rains; from November to April
Golf-shirts and/or T-shirts – preferably with a sleeve to protect your shoulders from the sun
Long-sleeved cotton shirts – for the evenings as protection against biting insects
Shorts and/or skirts – really short skirts are not practical for getting in and out of vehicles
Long trousers/slacks
Track suit - for cold mornings
Pajamas – lightweight for summer
Underwear
Good closed walking shoes
Socks
Sandals – preferably low heeled or flat
Swimming costume
Lightweight jersey or fleece
Rain gear or jacket for summer months
Lightweight jacket for early mornings in winter
Scarf, gloves and beanies for early mornings in winter

Equipment/Other:

Good quality sunglasses, UV protected, preferably polarized. Tinted fashion glasses are not good in strong light.
If you wear contact lenses, we recommend that you bring along a pair of glasses in case you get irritation from the dust
Personal toiletries
Moisturizing cream and suntan lotion – SPF 30 or higher recommended
Insect repellent for body application, e.g. Tabard, Rid, Jungle Juice, etc.
Tissues/Wet Wipes
Basic medical kit (aspirins, plasters, Imodium, antiseptic cream and antihistamine cream, etc.)
Malaria tablets (if applicable)
Antihistamine tablets if you suffer from any allergies
Anti-nausea tablets if you suffer from motion sickness
Torch
Camera equipment including spare batteries, chargers, film, flash cards, memory sticks, etc.
Waterproof/dustproof bag or cover for your camera
Binoculars for viewing both wildlife and birds
Visas, tickets, passports, money, credit cards, insurance details, etc.

NOTE 1: Bright colours and white are not advisable whilst in the bush. Camouflage clothing is not recommended for travel in African countries.

NOTE 2: There may be a luggage restriction on your travels – please ensure that you familiarize yourself with the Airline luggage restriction details before traveling to Mozambique.

NOTE 3: A limited number of reference books are available in the steadily growing EO Wilson Laboratory Library for use during your stay.

Release and Waiver of Liability

1. I, *[full name]* _____, understand and acknowledge that my visit to, research in, or any other activities within the **Gorongosa National Park and its Buffer Zone** may involve risks and dangers that could result in damage to or loss of personal property, personal injury or loss of life including, but not limited to, travel to, within and from rustic and/or remote areas, under rugged conditions, by plane, ultralight, helicopter, truck, boat and other modes of transportation; lack of adequate or immediately available medical care; forces of nature, unpredictable weather, wildlife (including elephants) and unstable political conditions; tree climbing; and other dangers that no amount of care, caution or experience can eliminate.

2. Having read and understood the terms of this Release and Waiver of Liability and in consideration of my visit to, research in, or any other activities within **Gorongosa National Park and its Buffer Zone**, I for myself, my spouse, family, heirs, executors, administrators, and legal representatives HEREBY RELEASE, WAIVE AND FOREVER DISCHARGE Gorongosa Restoration Project, its officers, directors, agents, employees, members and contractors (collectively, "Releasees"), from any and every claim, liability, demand, action, or cause of action, of whatever kind or nature, either in law or in equity, arising from or by reason of any property loss or damage, bodily injury or injuries known or unknown or death occurring, growing out of, incidental to, or resulting directly or indirectly from my participation in research and any other activities, whether due to the fault or negligence of Releasees, circumstances beyond Releasees' control, or otherwise. I understand and agree that Releasees have not expressly or impliedly assumed any duty or obligation toward me or associated with my participation in research or any other activities in the **Gorongosa National Park and its Buffer Zone**.

3. I EXPRESSLY AND VOLUNTARILY ASSUME ALL RISK OF PERSONAL INJURY, DEATH OR PROPERTY DAMAGE/LOSS sustained while participating in research or any other activities in the **Gorongosa National Park and its Buffer Zone** whether due to the fault or negligence of Releasees, circumstances beyond Releasees' control, or otherwise.

4. I undertake that I will only drive a Park, rental or other vehicle, whether within or outside of the **Gorongosa National Park and its Buffer Zone**, on the basis of being in the possession of a valid driving license and having the required driving experience to safely use said vehicle under the dangerous and unpredictable field conditions created by terrain, weather and wildlife.

5. I acknowledge that where I am a passenger in a plane, ultralight, helicopter, truck, boat and other mode of transportation within the **Gorongosa National Park and its Buffer Zone** I do so out of my free will.

6. I agree that it is my responsibility to obtain adequate insurance, including medical and evacuation insurance and insurance coverage for claims related to bodily injury, loss of life and property damage to cover my participation in research or any other activities in the **Gorongosa National Park and its Buffer Zone**.

7. I further release Releasees and all other officials or professional personnel from any claim whatsoever on account of first aid, medical treatment or other health-related services rendered to me during my research or any other activities in the **Gorongosa National Park and its Buffer Zone**, and shall assume full responsibility for payment of any such aid, medical treatment or other services so rendered.

Initials _____

8. I agree to indemnify Releasees from any loss, liability, damage or cost they may incur as a result of my participation in research or any other activities in the **Gorongosa National Park and its Buffer Zone** including attorneys' fees.

9. I further agree that Mozambican laws are the only laws applicable to this matter, and that the Mozambican Courts have exclusive jurisdiction to resolve any dispute which may arise from it. I expressly renounce any right I may have to institute or join proceedings relating to this matter in any other court or arbitral forum.

10. This Release and Waiver of Liability contains the entire agreement between the parties. The terms of this Release and Waiver of Liability are contractual and not a mere recital.

11. I have been fully and completely advised of potential dangers incident to participation in research or any other activities in the **Gorongosa National Park and its Buffer Zone**. I have carefully read the foregoing Release and Waiver of Liability, am fully aware of the legal consequences of signing it, and have signed it of my own free will.

Gorongosa Restoration Project

Permission for Emergency Medical Treatment

I, [*full name*] _____, hereby grant Gorongosa Restoration Project (“GRP”) permission to authorize medical treatment on my behalf, including, but not limited to, administration of antibiotics, anesthesia and other medications, transfusions or blood products, life-saving and other necessary surgical procedures, and hospitalization, in the event that I am unable, for any reason, to authorize or approve of such treatment on my own behalf. I further agree to hold GRP harmless for any or all actions relating to or arising out of any such emergency medical treatment.

Guidelines for researchers in the field

Scientists working at Gorongosa National Park should be aware of the following to help ensure their safety and successful research.

Institutional context

- You will be conducting research in the flagship National Park of Mozambique. Your research is subject to a research permit issued by the Gorongosa Restoration Project under the auspices of the Long Term Agreement between the Government of Mozambique and the Gorongosa Restoration Project. You will abide by the laws and regulations of the country in general and the Park in particular. All researchers are required to sign a Waiver of Liability, effective for the duration of their presence and activity in the Park.

Initials: _____

Access to the field

-If you are new to the park, you must initially go to the field accompanied by a ranger (fiscal) until you are familiar with your working area prior to doing fieldwork alone. Working with a ranger will help you get to know the park safely.

- A ranger must accompany you if you will be leaving your vehicle for measuring, sampling and collecting purposes. Rangers will help you be aware of your surroundings, particularly of the presence of lion or elephant. But the presence of a ranger does not eliminate the need to remain alert and aware of your surroundings while conducting fieldwork!

- Over time, you may be allowed to work unaccompanied by a ranger even when exiting the vehicle. The specific circumstances of your work, including the area of the Park, the distance from your vehicle, prevailing ecological and political conditions, etc. will all need to be taken into account. This concession will be at the discretion of the Director of Scientific Services and Director of Conservation and may be withdrawn at their sole discretion.

-All activities are to be undertaken during normal daylight operating hours unless you have received permission for extended working hours necessitated by your specific research requirements.

-You must receive prior permission for any overnighting in the field or at the ranger's outposts. Personnel at these locations need to be informed prior to your arrival.

-Gorongosa is home to many large crocodiles. Approach any waterbody, however small and however far from the larger rivers and lake, with extreme caution. Do not linger on the banks of rivers and pans. Remember that crocodiles are able to surprise wild animals that are very aware of their natural environment (we humans are far less aware).

- Other dangers: In addition to large mammals and crocodiles, other animals may pose a significant risk to researchers in the field. Gorongosa is home to nearly 40 species of snakes, including several highly venomous ones. Never attempt to catch or approach snakes, especially if you are not intimately familiar with the herpetofauna of Mozambique. Colonies of wild bees are common in Gorongosa and attacks on people by large swarms happen frequently. If you are allergic to insect stings, or are unsure if you are, always carry an epinephrine autoinjector ("EpiPen") while in the field. Vectors of tropical diseases, especially malaria, are present in Gorongosa. Before beginning your project in the park, you must acquire all necessary vaccinations and prophylactic medications.

- Part of the year it is very hot in Gorongosa. It is wise to bring sufficient drinking water with you in case of a car breakdown or puncture.

Initials: _____

Vehicle

- Only go into the field using a suitable four-wheel drive (4x4) vehicle. If the vehicle does not belong to GRP, it should have a temporary GRP magnet on it to identify it as an approved researcher vehicle.

- You should feel comfortable driving on rough roads and you should be able to change a tire. If you need help gaining these skills, please talk with the research manager.
- Prior to leaving the camp, check the air in your tires, coolant, and oil. Ensure that you have sufficient fuel. Also make sure that tools to change a tire are in your vehicles before going to the field. Be aware that you could have a puncture far out in the Park where you may be 2 or more hours away from any help. You could easily end up spending the night in the field if you did not check that you have a spare (inflated) wheel and jack! You should have your vehicles serviced by the park's mechanics regularly and can ask the research manager for help in this regard.
- Gorongosa presents some extremely challenging and debilitating conditions for vehicles in the field. The wear and tear on vehicles could be one of your main project costs. Please be extremely aware of your vehicle and of driving conditions.
- Only use the roads that can be safely driven in terms of wetness, vehicle ability and your own 4x4 driving ability. If in doubt, do not proceed. Much of the park is underlain by heavy clays. Under wet conditions, roads quickly become impassable. Even if you can make it through, you will cause rutting and other damage to the roads. If you notice that you are causing new ruts on wet roads, do not proceed. You may be asked by the park staff not to drive out of the camp if conditions are judged to be too wet.
- The speed limit within the park is 30 km per hour. Safe operating speeds are generally well below this. In particular when driving through thickly wooded areas and under low light conditions travel slowly. This will assist you in spotting elephants and in avoiding killing smaller animals on the road. Do not drive across columns of raiding Matabele ants. Pay attention to smaller animals, such as snakes and frogs – they are all equally protected in the National Park.
- In general, all driving is to be confined to the existing roads and tracks only.
- You may be given permission for off-road travel for your particular research activities. This concession will be at the discretion of the Director of Scientific Services and the Director of Conservation. Do not drive off-road if you are causing any ruts. Always drive off-road at slow speed. Be extremely aware of the ground in front of you in terms of hidden stumps and holes. If you cannot see the ground surface, you should have someone walk in front of the vehicle to spot for you. This also applies to recognized roads and tracks that may not yet have been cleared in the current field season.
- There have been some vehicles hit/tusked by elephants. Do not provoke them by driving too fast, making a lot of noise or approaching too closely. Elephants, and other wildlife for that matter, always have the right of way.
- If you find places where trees or bushes felled by elephants block the road, please report the location to the Park management

Initials: _____

Communication while in the field

- Inform your colleagues/research manager of your daily plans and approximate area of work. Sign out on the vehicle check-in/out board at the lab.

- The cell phone service with the best coverage inside the park is Movitel. You should go to the park with a working cell phone (although coverage is not complete) and phone numbers of the Research Manager and the Director of Operations.
- Your ranger should have a fully charged, working, radio. Please double-check this before going to the field.
- If you will not be able to get back within normal operating hours, try to inform someone, first and foremost law-enforcement (code "201") via fiscal radio. This allows the ranger at the gate to prepare for your late arrival or to coordinate a search-and-rescue if necessary.

Initials: _____

Collecting

- Only collect samples necessary for your work or to assist the work of colleagues. In Gorongosa, we try to foster a collegial approach to research and we try to support each other's work. Therefore, it is permissible for you to collect specimens/samples that fall outside the items mentioned in your approved research project, but only if there is a clear use of those samples/specimens by another colleague/park staff. Please immediately inform the Research Manager that you have made such an extra collection.
- A similar rule applies to data and observations – the Wilson Lab maintains a database of specimens and biological observations, and all researchers are strongly encouraged to contribute their data and observations, even those that fall outside the scope of their particular project, to our shared database.
- Only collect the necessary quantities of samples/specimens and avoid wastage.
- There will be no collecting of specimens for personal use or keepsakes.
- Do not collect skulls or bones to bring them back to camp. These are part of the biological and visual landscape; they form habitat and food for various animal and plant species; their slow decomposition returns nutrients to the soil; and there is no need for them in camp. Leave them alone unless they are required for a specific defined and authorized research project.

Initials: _____

Illegal activities

- If you see poachers or signs of illegal activities, please note the time and location and report it as soon as possible. Particularly if poachers are seen, please encourage the ranger accompanying you to radio in the location immediately.
- You are not to take any active part in any law enforcement operation. Although your field trip may by coincidence become a law enforcement operation because signs of illegal activities are encountered, you need to stay out of it. Do not try to apprehend poachers or perpetrators of any other illegal activities. Leave this to the Park staff.
- Any mortality of wildlife should be treated like a crime scene until we know further. As such, Park rules require that Conservation-Law Enforcement respond to static signals of any collared/ tagged individuals first. It generally prevents researchers from walking in to dangerous situations, e.g. possible poachers, an ambush by LE, a poisoning scene, etc and interfering with evidence. If researching the given species you may, however, request to accompany LE to the site of the static signal.
- Respect the humanity and dignity of any person arrested for poaching or other alleged illegal activity in the Park. Do not take photographs of any people that have been apprehended.

Initials: _____

Respecting people and the park

- If you are a foreign researcher, be aware that you are a guest in the flagship National Park of a foreign country. Please remember that you will likely come from a very different culture and that you have a very different level

of education and exposure from most of the staff and local residents. Please be respectful of all staff, however junior, as well as of the local residents and tourists.

- Please try to engage your ranger so that he/she understands the purpose of your work, what samples you are collecting etc.

- Do not instruct rangers or other park staff to undertake actions that clearly put them in an awkward position in terms of their level of authority and discretion. You have no authority over the staff of the National Park.

- If you notice an injured animal while in the park, please note the time and location and report it as soon as possible to the Research Manager or a responsible member of the Conservation Department. You do not have the authority to instruct park staff as to what should or should not be done with such an animal.

- You will need to abide by all lawful instructions of park staff.

- Do not leave any litter or collecting/marketing material in the park. At the end of your field season remove any flagging you may have used in the field.

- Consider the implications of your communications via social media. You are reporting from a very different biological, socio-economic and cultural context. Be careful about what could be 'lost in translation' and that therefore could unintentionally reflect badly on the Park, your colleagues, or on your own work.

- Please be considerate to our other visitors. Tourists and educational groups are very important to the sustainable future of the Park and have right-of-way in the game-viewing area. Please be courteous and patient. Do not spoil their viewing experience by rushing past and leaving them in a big dust cloud. Do not scare off animals which they are viewing. Generally, stop and stay behind the game-viewing vehicle (with lights off at night) and only pass slowly as the guide waves you past. Please stop and greet the guide and the tourists. Please respond to any questions that visitors may have when they interact with you in the field or in camp. Visitors love to learn more about the Park and you can be the perfect Park ambassador.

-Please be sure to sign a liability waiver upon arrival at the park declaring that you assume responsibility for yourself while working in the park.

Enjoy your time in the field in Gorongosa; it is a diverse, fascinating park, and we are happy you decided to conduct your research here!

I,, have read and do accept the above guidelines.
